- **Support for Microsoft Windows 7/8/10**
- **Independent from Cloud, no worries for data breach**
- **RansomGuard efficiently backups only damaging files.**
- **Works with traditional security products**
- **Integrated scheduled backup and folder protection**
- **Managed through CheckMAL Central Management System**

HIGHLIGHTS

PROTECTION FROM RANSOMWARE THREATS

Powerful protection from ransomware is provided by CheckMAL's Context Awareness Ransomware Behavior engine, supported in real-time without cloud, analyzes file damages by ransomwares.

RANSOMGUARD PROTECTION

Original files damaged by ransomware is kept in a driver-level protected directory, efficiently keeps only files that are affected by ransomware attack, providing minimum disk space usage for backup.

RECOVER YOUR DATA EVEN IF DETECTION FAILS

Integrated scheduled backup provides an additional layer of protection of your files. Keeps track of file change and only changed files are accumulated.

SIMPLE, WORKS WITH TRADITIONAL AV

AppCheck Pro detects and stops ransomware activity at the moment of the behavior of file damage while traditional antivirus software prevents ransomware before its execution. This enables co-existence of AppCheck Pro and traditional antivirus software.
